CONSIDER CLIMBING LOBUCHE PEAK (6,119 M.) FOR EXTRA ACCLIMATIZATION

For people with a sufficient time frame, an excursion to nearby Lobuche Peak, 6119m, is a great way to ensure you are well acclimatized before you start the Mt. Everest Expedition.

OVERVIEW:

Ask an adventurer about their dream, and they will answer you with a word; **EVEREST**. Who would not want to reach the top of the world? Who would not want to touch the sky? It's the trip of the lifetime, the Everest Expedition. **Mount Everest**, also known as The Sagarmatha in Nepali is the tallest peak on earth with an altitude of 8848.86m. The southern face lies in Nepal whereas the northern face is in Tibet. In 1715, China surveyed the mountain for the first time while they were mapping Chinese territory and depicted it as Mount Qomolangma. British Indian government 1856 again measured Mount Everest during their Great Trigonometry Survey. Back then, it was named Peak XV and said to be 8840m tall.

Peak XV was renamed after Sir George Everest as Mt. Everest, a name given in his honor, who was a lead surveyor in 1856. Sir George was a Welsh Surveyor; he was the surveyor-general of India for thirteen years from 1830. Everest has fascinated mountaineers all around the globe since the 1920s when Tibet opened climbing in the early 1920s. In 1922 British Expedition team led by Charles Bruce tried to scale the summit of Mount Everest

for the first time. It was Edward Norton in his second attempt along with the British Expedition team that set the height of 8572m. The mountaineers George Mallory and Andrew Irvine disappeared on the third attempt. Mallory's body was found in 1999. There were several attempts made to Everest before the successful attempt made by **Edmund Hillary and Tenzing Norgay** on 29 May 1953 via the South route. It is now reported that around 1000 ascent attempts are made every year.

We will take the southern route to the summit. This trip suits those who have previous experiences of a few 7000m peaks or even more. The real trek starts from the Base Camp and to reach the base camp takes you around 7 days on foot. We will move on to **Camp I (6,065m)** where we will see the **Khumbu glacier**. From Khumbu Glacier, it is around 450m on a gradual slope to **Camp II (6,750m)** and around 610m to **Camp III (7,300m)**. Camp III is located at the head of Lhotse. From this point onwards, you will need oxygen cylinders. You will reach **Camp IV (7,910m)** after just crossing 8000m elevations. This point is also known as the Death Zone.

Mount Everest Expedition is undoubtedly a lifetime opportunity. Nevertheless, these expeditions encounter many hindrances such as high altitude, severe weather conditions, and avalanches. One must be well trained before actually trying it. You need to get your body ready for the **8848.86m** climb to Everest's summit. Depending on your current level of fitness, you need to train for several months before you start your ascent. A climber must build his/her cardiovascular strength along with muscular strength; oxygen level drops by 60-70 percent from sea level. Also, make sure you can carry big

backpacks to the top as you will be carrying a cylinder of oxygen and large bag packs along with you. One must acclimatize with weather conditions and be prepared for rock falls, and avalanches. Learning rescue techniques would be an added advantage.

Our Airbus, Heli Everest will all time be supporting our team by supplying fresh - fruits, vegetables, meats, and other food items almost every day, and it's also always ready for your safety at your needs.

" We await to serve you our service and share our experience with you "

INSURANCE:

There is a fine line between adventure and blatant risk. Mountaineering is an adventure trip that carries an intrinsic danger and the nature of travel implies things don't generally go according to plan, which is the reason why we require every one of our clients to get acceptable and proper insurance.

Due to unanticipated reasons, for example, injury, family issues, work commitments, etc., clients may need to cancel their trip before the start or during the expedition. Considering these factors, it's better to be prepared for the possibilities.

As mentioned in the Terms and Conditions of Seven Summit Treks, the agency is exempt from being liable for

different expenses that may occur in case of different emergencies or unforeseen situations. In addition to that, a foreigner isn't allowed to purchase insurance on Nepali soil. Both facts point out the requirement of a client to purchase an elaborate travel insurance plan in their place of origin that protects their interest in case of trip cancellation, helicopter evacuation, medical emergencies, other illnesses, lost luggage, theft, disasters, death, and so on.

You are free to pick your insurer however look for an arrangement that covers trip postponement and cancellation, rescue, and covers medical as well. Guarantee it doesn't have limitations on the height you will climb,

prohibitions on the exercises you are embracing, or the places you will be visiting. Protect yourself with the right insurance so you can go on your expedition with peace of mind and focus more on your climbing.

Please make sure to send us a copy of your insurance policy before you start your expedition so that we can assist you in any case of an emergency.

Please find the details about insurance before buying the policy [here](#).

BOOKING & PAYMENT PROCESS:

If you intend to embark on an adventure through Seven Summit Treks Pvt. Ltd. you are required to book a trip 3 months before the trip. A three months preparation period is necessary to ensure maximum safety and satisfaction of the clients.
